LOGO USAGE

Use the simplest approved signature.

Choose the form that remains unmistakable at the intended size. Never rebuild or recolor the artwork.

WORDMARK / 160 PX MINIMUM

COMBINED LOCKUP / 220 PX MINIMUM

ICON / 32 PX AND ABOVE

Wordmark

Primary editorial signature for navigation, presentations, and quiet brand moments.

Combined lockup

Use for hero moments when the lens icon can stay distinct inside the wordmark.

Standalone icon

Use for app, profile, and product applications at 32 px and above.

Favicon

Below 32 px, switch to the simplified production favicon rather than shrinking the full icon.

WHAT TO AVOID

Protect recognition by keeping the artwork intact.

Use supplied production assets exactly as they are. These treatments weaken the identity.

The Magic Mirror logo is shown on a light gray background. The text is stretched horizontally, making the letters wider than they are tall. A small black circle with a white 'x' is in the top right corner of the card.

Magic Mirror

Do not distort

No stretching, compression, rotation, or altered proportions.

The Magic Mirror logo is shown on a green-to-dark-green gradient background. The text is white. A small black circle with a white 'x' is in the top right corner of the card.

Magic Mirror

Do not add effects

No gradients, shadows, outlines, glows, or decorative treatments.

The Magic Mirror logo is shown on a very light green background. The text is extremely faint and barely visible. A small black circle with a white 'x' is in the top right corner of the card.

Magic Mirror

Do not lose clarity

No low-contrast placement, unapproved recolors, or full-icon use below 32 px.

PRIMARY COLORS

Acid energy, grounded by Ink.

The operational set is direct and high contrast. Pale and Deep extend the system without introducing new hues.

SECONDARY COLORS

Build depth from approved anchors.

Supporting values use linear OKLab interpolation between Pale, Acid, Deep, White, Cloud, and Ink.

Acid tonal scale

PALE → ACID → DEEP

CANVAS

#FFFFFF

White

Default brandbook and product background.

SURFACE

#F4F3F1

Cloud

Quiet separation without introducing a new hue.

CALLOUT

#F2FFD0

Pale

Low-intensity Acid support for selected panels.

ANCHOR

#17171A

Ink

High-contrast text and dark application surface.

BUTTONS AND LINKS

Make the next action obvious.

Use Acid for decisions, Ink for structure, and a visible focus treatment for keyboard navigation.

Radius 999 px

Focus 3 px Acid + Ink offset

Label Space Grotesk 600

Editorial structure with technical signals.

A small set of repeatable elements makes product and presentation surfaces feel related.

READY TO RENDER

Your look,
in focus.

Upload one photo. Choose one garment. See the result.

01

02

03

BADGE

Short status language

Use uppercase labels for render and prototype states.

CALLOUT

“Confidence before checkout.”

Keep editorial copy short and purposeful.

FOCUS

Keyboard focus

Reserve Acid for active or actionable moments.

COLORS COMPLIANCE MATRIX

Contrast decisions, calculated.

AA requires 4.5:1 for normal text and 3.0:1 for large text. The matrix shows all approved anchor pairings.

Anchor matrix

AA normal Large only Fail

22 colors / 484 ordered pairs / 178 normal-AA passes

Compact, confident, easy to remember.

BILLBOARD MOCKUP

High visibility for virtual try-on.

FAVICON MOCKUPS

Use the app icon in browser chrome.

Separate light and dark scenes keep the favicon, tab title, navigation, and page identity realistic in both modes.

A recognizable X profile for the prototype.

The avatar, handle, profile controls, and tabs make the platform clear without implying a live account.

Professional context, platform-specific structure.

A company view and Experience card create a recognizably LinkedIn application - not a relabeled social profile.

T-SHIRT MOCKUP

On dark fabric, use the Acid icon.

Useful objects should still feel editorial.

TYPOGRAPHY

Instrument Serif character, Space Grotesk clarity.

Use the display face for short editorial moments and the sans for product UI, labels, tables, and body copy.

TYPOGRAPHY WHAT TO AVOID

Readability beats decorative noise.

Do not make users work to understand upload guidance, garment choices, render states, or photo-retention information.

✕ Too much space between lines	Magic Mirror helps shoppers choose clothing with more confidence.
✕ Too little space between lines	Magic Mirror helps shoppers choose clothing with more confidence.
✕ Letters too close together	MagicMirrorhelpsshopperschoosewithconfidence.
✕ Letters too far apart	M a g i c M i r r o r
✕ Too-small body text	Photo upload, garment choice, render state, and privacy guidance must remain readable.
✕ Overusing the display face	<i>Do not use the display face for paragraphs, labels, or product instructions.</i>
